

October 23, 2020

Dear patients and colleagues,

Our team at BEVSA(Dr. Curl and Noor) and Access Care(outpatient center) would like to update you that during this difficult time of the COVID-19 pandemic, **WE ARE OPEN** at the AMHERST location (4960 Harlem Road) and have temporarily closed the BGH offices.

During this time, we are open for clinic visits, doppler studies and outpatient angiograms on patients needing interventions for PAD with wounds, leg pain, rest pain and infections. ESRD with access problems as well. We have a new phone system in place where we are able to return calls within 48 hours, so we can respond to patients and doctor's offices quickly. All our numbers remain the same as before, (716) 859-3301, option #1 for Dr. Curl, #2 for Dr. Noor and #5 is our appointment line.

We continue to monitor the current Covid-19 updates daily and are following all Center for Disease Control and Department of health guidelines at our facility, to ensure that patients and employees are all safe and stay healthy.

We are taking extra care now, our exam, procedure and recovery rooms are cleaned/disinfected after every patient. We continue to clean/disinfect all surface areas as well, including doorknobs, beds, tables, counters, chairs, restrooms and equipment. In addition, we are taking the temperature of all patients/visitors along with our staff daily to ensure there is no spread, if someone has a fever we are rescheduling them before they can enter the exam room.

We will continue to take the proper measures and precautions to ensure the safety of our patients, their families, and our staff. Thank you for your partnership and confidence in us as we navigate this difficult time. We wish you and your families continued safety and health.

Thank you.

Sincerely,

Sonya Noor, MD, Richard Curl, MD, BEVSA and Access Care Staff.

ACCESS CARE VASCULAR- 4960 HARLEM ROAD SUITE 100, AMHERST NY 14226
